

Timeline 3rd May

The heart of the miracle is the timeline of the things happened on the 3rd May 2007 at the Oceans Club. A good resource for the very first and early timelines can be found at McCannFiles:

1. →[PJ Files: Timeline for 03/04 May 2007](#)
2. →[The First Searches, 03/04 May 2007](#)
3. →[Timeline and press reports for Thursday 04 May 2007](#)
4. →[Key events in the search for missing Madeleine McCann, 03 May to 6 September 2007](#)

The original of the last timeline can be found at →[dailymail.co.uk](#). Also a good source for timeline/events is →[HiDeHo](#)

The statements of dependent and independent witnesses differ at crucial points.

The last independent Sighting of Maddie:

Maddie stayed until 17:30 in the Kids Mini Club. This is testified by a signed list and the [Nannies](#) of the [creche](#).

The last dependent Sighting of Maddie:

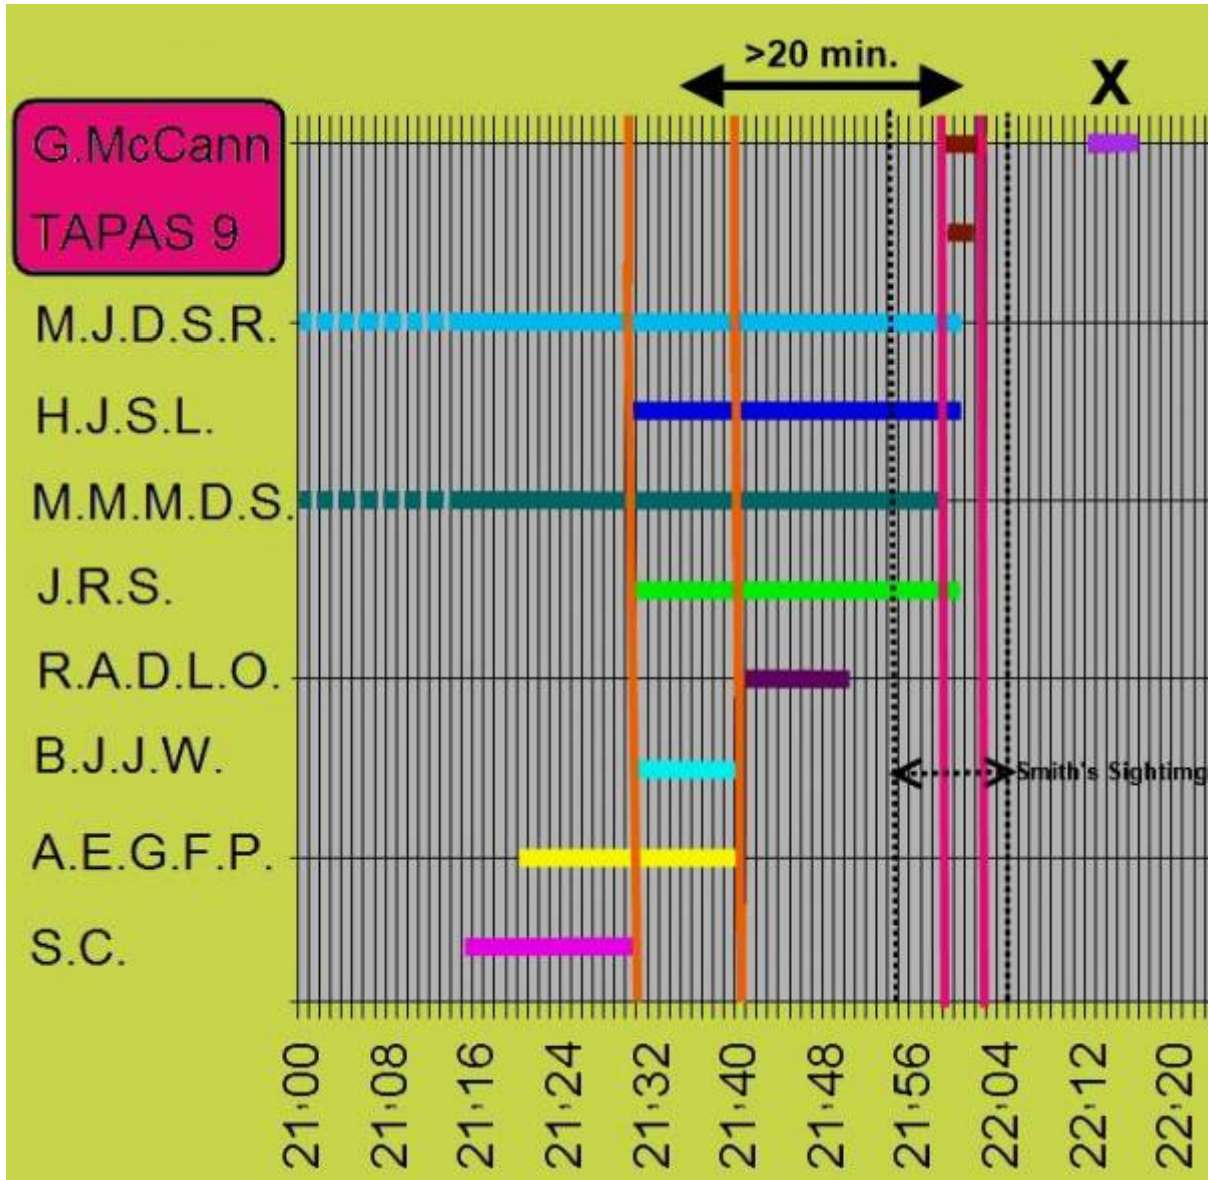

This depends on the partly contradicting statements of [Gerry McCann](#) and [David Payne](#). If statements are correct, then it was David Payne who was the last, apart the McCann's, who saw Maddie in the time between 18:30 and 19:00.

The Alarm:

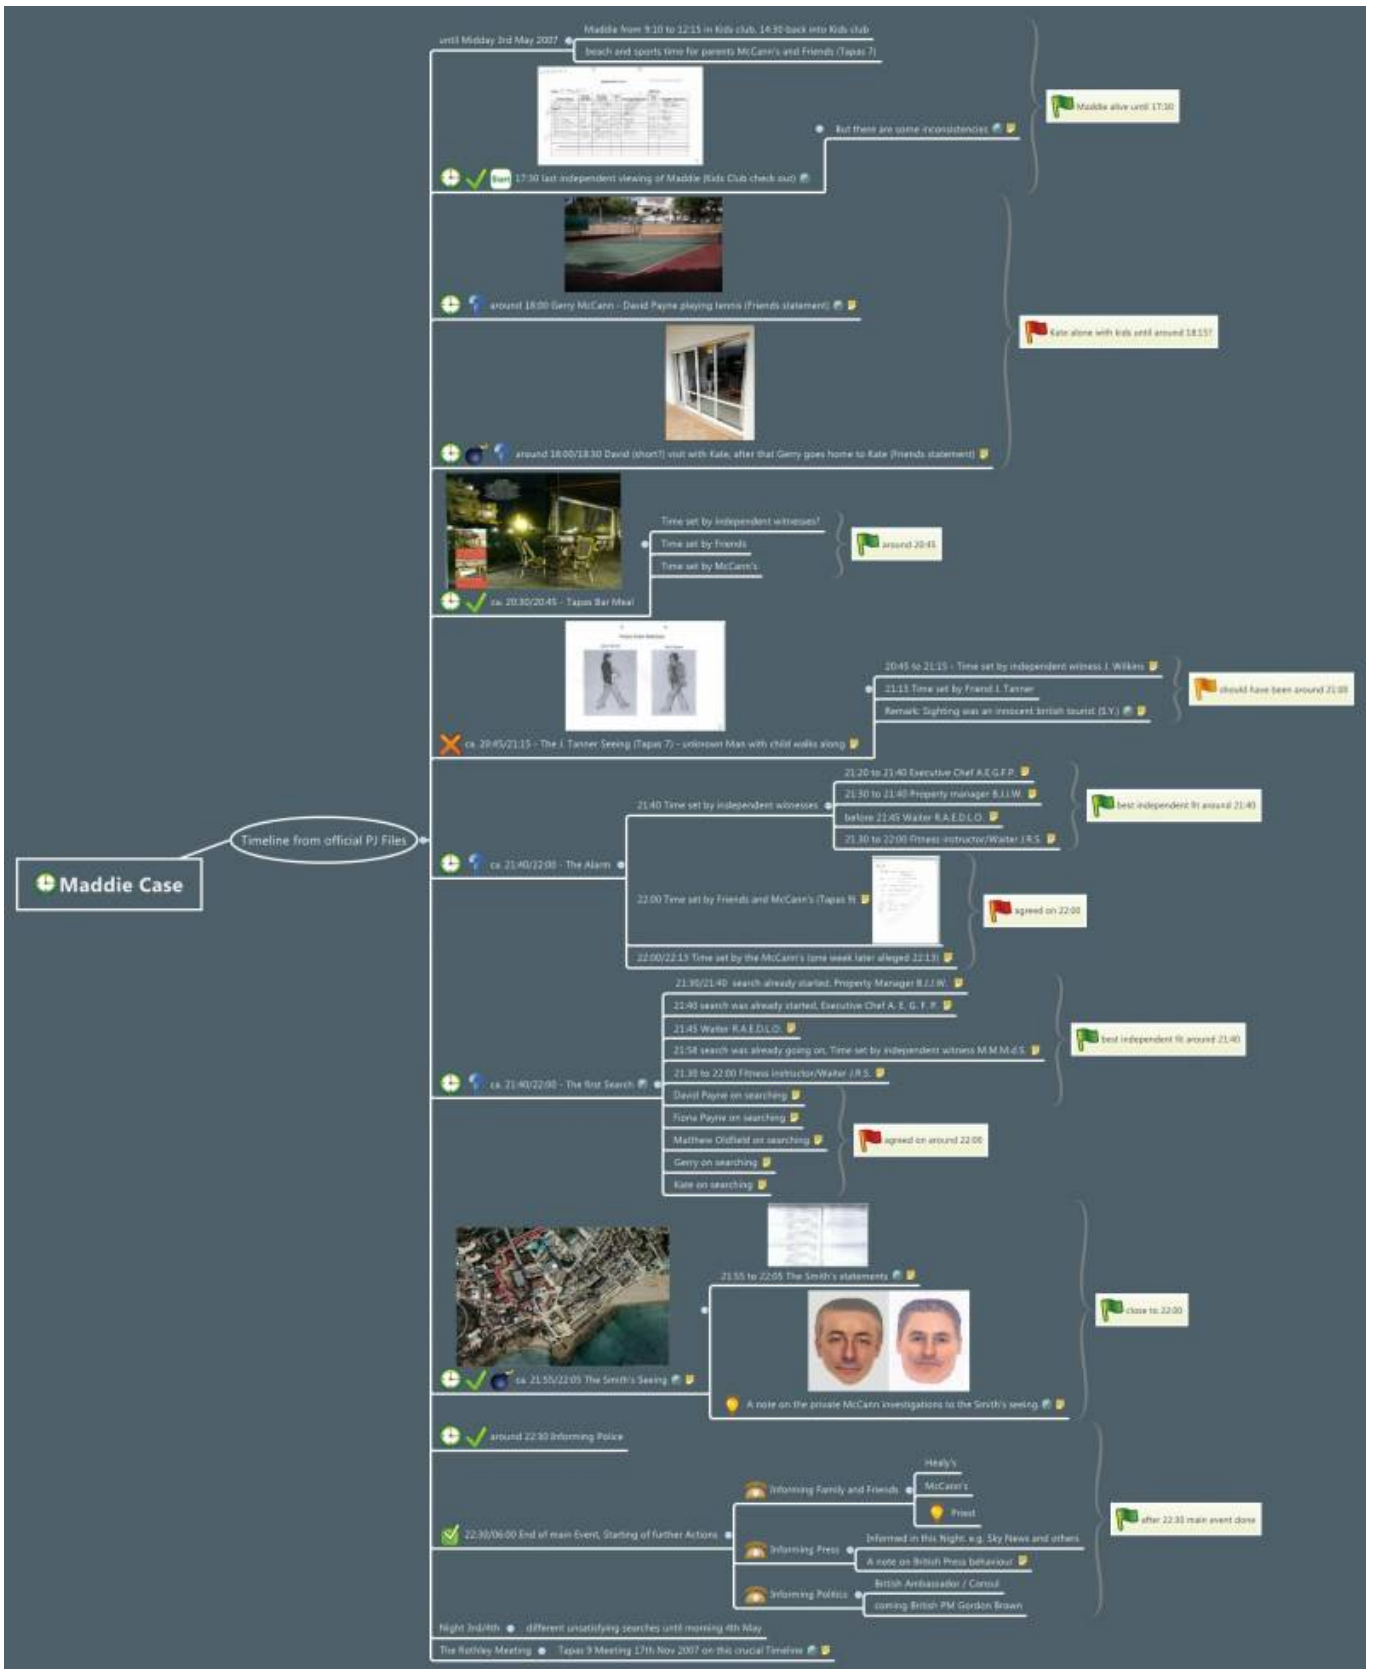

The most crucial point is the question at what time exactly the Alarm was raised by Kate McCann?

- There are **eight** [independent Witnesses](#) who state that this happened somewhere before 22:00, average: 21:37.
 - The [Tapas 7](#) and the [McCann's](#) but agreed by [a finalized list \(3-May-2007, list given to the PJ\)](#) on exactly 22:00 for the Alarm.
 - One week later (10-May-2007, in his second interview) [Gerry McCann](#) corrected and alleged even more now the Alarm happened about 22:13.
-

The disturbing fact is: The [Sighting of the Smith Family](#) of the main [suspect](#) occurred around 22:00 in the vicinity of [Apartment 5A](#). This but became known to PJ first on 26-May-2007. By what reason where the [Tapas 9](#) eager to shift timeline by about half an hour into the future on May 3rd?

Between the average time from independent witnesses to the Tapas 9 written timeline there is a gap of 23 minutes. In his second interview on 10th May Gerry McCann even altered his time up to around 22:13 for the alarm (signed by the large X in graphics), which enlarges the gap to minimum 36 minutes.
