

(In)Famous Paedophile Rings

Some general Remarks

→[Wikipedia](#) on Pedophilia:

Pedophilia or paedophilia is a psychiatric disorder in which an adult or older adolescent experiences a primary or exclusive sexual attraction to prepubescent children, generally age 11 years or younger. As a medical diagnosis, specific criteria for the disorder extend the cut-off point for prepubescence to age 13. A person who is diagnosed with pedophilia must be at least 16 years of age, but adolescents must be at least five years older than the prepubescent child for the attraction to be diagnosed as pedophilia....Pedophilia was first formally recognized and named in the late 19th century. A significant amount of research in the area has taken place since the 1980s. Although mostly documented in men, there are also women who exhibit the disorder, and researchers assume available estimates underrepresent the true number of female pedophiles....Pedophilia is believed to have **occurred in humans throughout history**, but was not formally named, defined or studied until the late 19th century. The term paedophilia erotica was coined in 1886 by the Viennese psychiatrist Richard von Krafft-Ebing in his writing *Psychopathia Sexualis*. The term appears in a section titled "*Violation of Individuals Under the Age of Fourteen*", which focuses on the forensic psychiatry aspect of child sexual offenders in general....The term pedophile is commonly used by the public to describe all child sexual abuse offenders. This usage is considered problematic by researchers, because many child molesters do not have a strong sexual interest in prepubescent children, and are consequently not pedophiles. There are motives for child sexual abuse that are unrelated to pedophilia, such as stress, marital problems, the unavailability of an adult partner, general anti-social tendencies, high sex drive, or alcohol use. As child sexual abuse is not automatically an indicator that its perpetrator is a pedophile, offenders can be separated into two types: pedophilic and non-pedophilic (or preferential and situational)....

...While not causes of pedophilia themselves, childhood abuse by adults or comorbid psychiatric illnesses—such as personality disorders and substance abuse—are risk factors for acting on pedophilic urges. Blanchard, Cantor, and Robichaud addressed comorbid psychiatric illnesses that, "*The theoretical implications are not so clear. Do particular genes or noxious factors in the prenatal environment predispose a male to develop both affective disorders and pedophilia, or do the frustration, danger, and isolation engendered by unacceptable sexual desires—or their occasional furtive satisfaction—lead to anxiety and despair?*" They indicated that, because they previously found mothers of pedophiles to be more likely to have undergone psychiatric treatment, the genetic possibility is more likely. A study analyzing the sexual fantasies of 200 heterosexual men by using the Wilson Sex Fantasy Questionnaire exam determined that males with a pronounced degree of paraphilic interest (including pedophilia) had a greater number of older brothers, a high 2D:4D digit ratio (which would indicate excessive prenatal estrogen exposure), and an elevated probability of being left-handed, suggesting that disturbed hemispheric brain lateralization may play a role in deviant attractions.

...Pedophilia is one of the most stigmatized mental disorders. One study reported high levels of anger, fear and social rejection even towards pedophiles who have not committed a crime. The authors suggested such attitudes could negatively impact child sexual abuse prevention by reducing

pedophiles' mental stability and discouraging them from seeking help. According to sociologists Melanie-Angela Neuilly and Kristen Zgoba, social concern over pedophilia intensified greatly in the 1990s, coinciding with several sensational sex crimes (but a general decline in child sexual abuse rates). They found that the word "*pedophile*" appeared only rarely in The New York Times and Le Monde before 1996, with zero mentions in 1991. Social attitudes towards child sexual abuse are extremely negative, with some surveys ranking it as morally worse than murder. Early research showed that there was a great deal of misunderstanding and unrealistic perceptions in the general public about child sexual abuse and pedophiles. However, a 2004 study concluded that the public was well-informed on some aspects of these subjects.

...From the late 1950s to early 1990s, several pedophile membership organizations advocated age of consent reform to lower or abolish age of consent laws, as well as for the →[acceptance of pedophilia](#) as a sexual orientation rather than a psychological disorder, and for the legalization of child pornography. The efforts of →[pedophile advocacy groups](#) did not gain any public support and today those few groups that have not dissolved have only minimal membership and have ceased their activities other than through a few websites.

....Anti-pedophile activism encompasses opposition against pedophiles, against pedophile advocacy groups, and against other phenomena that are seen as related to pedophilia, such as child pornography and child sexual abuse. Much of the direct action classified as anti-pedophile involves demonstrations against sex offenders, against pedophiles advocating for the legalization of sexual activity between adults and children, and against Internet users who solicit sex from minors. High-profile media attention to pedophilia has led to incidents of moral panic, particularly following reports of pedophilia associated with Satanic ritual abuse and day care sex abuse. Instances of vigilantism have also been reported in response to public attention on convicted or suspected child sex offenders. In 2000, following a media campaign of "*namings and shaming*" suspected pedophiles in the UK, hundreds of residents took to the streets in protest against suspected pedophiles, eventually escalating to violent conduct requiring police intervention.

...Pedophilia is not a legal term, and having a sexual attraction to children is not illegal in itself. In law enforcement circles, the term pedophile is sometimes used in a broad manner to encompass a person who commits one or more sexually-based crimes that relate to legally underage victims.

Some well known Paedophilic Rings, Institutional Abuse

Some special Remarks

In regard to the case of [Madeleine Beth McCann](#) in both alleged versions (1) [Abduction Hypothesis](#) and (2) [Accidental Killing Theory](#) we have suspected links to paedophilia. In version one it is the alleged “they have taken her...” of the parents McCann, who [suspect](#) a still unknown offender, or even Paedophilic Ring, who took away little Maddie. In the second version, seemingly the so called [Payne-Allegation](#) plays a central role, at least. From meta-information seemingly there are also links to [Paedophilic Rings](#).
